

To Whom It Concern: I am an over the road truck driver who hauls hazmat. Having the XM Radio Traffic and Weather has helped me to get around. To go to the instant Traffic and Weather on XM Radio has helped me to avoid major traffic delays. With what I haul I am routed and waiting a few minutes at a truck stop 40 - 50 miles away may help me not to be in a major back up. The Traffic and Weather on XM Radio has helped to keep my load safe when bad weather has been forcasted. I can make the call hours ahead of time and not just minutes before I come into a city.

Trying to find a local radio station when I am maybe 100 miles from a major city is just not going to happen. But going to the XM Radio I have it in a monents notices, no matter where I am.

Thank you!
